

MLA1010 Disposable ECG Electrodes (100)

Accessories

A pack of 100 disposable Ag/AgCl ECG electrodes for use with snap connect lead wires MLA0313, MLA0315, MLA2503 and MLA2505. The electrodes can be used for ECG, EOG and EMG.

Preparation: Before attaching the electrode, gently abrade the skin using abrasive gel (MLA1093). This reduces electrical resistance and improves the quality of recordings.

Caution

Read “Statement of Intended Use” on our website before use. Leads are not supplied sterile. Appropriate Infection Control Procedures should be followed between subsequent subject connections.
